PROFESSIONAL SUMMARY

Software Developer with experience building full-stack web applications and interactive Power BI dashboards. Worked with React, JavaScript, SQL, Git, and modern frontend tools to develop responsive interfaces and data-driven solutions. Interested in software engineering, artificial intelligence, and data analytics, with a focus on building practical applications that solve real-world problems.

EDUCATION

JECRC University, Jaipur — B.Tech, Computer Science & Engineering *2024 – 2028*
CGPA: 9.01 / 10

PROJECTS

AI-Powered Chatbot *GitHub Live*

- **Problem Statement:** Design and develop a modern AI chatbot that enhances the user experience through real-time conversations, document understanding, and personalized interactions.
- **About the Project:** Built **Flux AI**, a full-stack AI chatbot with real-time streaming responses, document & image analysis, voice synthesis, chat export, and secure authentication in a responsive interface.
- **Outcome:** Gained hands-on experience in integrating Large Language Models (LLMs), implementing real-time response streaming, secure authentication, document processing, and building scalable full-stack web applications.
- **Tech Stack:** *React • TypeScript • Tailwind CSS • FastAPI • Python • Groq API • Clerk Authentication • REST API • Git • GitHub*

Portfolio Website *GitHub Live*

- **Problem Statement:** Recruiters and collaborators needed a single, easily accessible place to view projects, skills, and contact details instead of scattered links across platforms.
- **About the Project:** Developed a modern, responsive portfolio site with HTML, CSS, and JavaScript, integrating Email-JS for direct communication and one-click resume download, deployed on Vercel.
- **Outcome:** Strengthened my skills in responsive web design, modern UI/UX development, component-based architecture, animations, deployment, and building production-ready frontend applications.
- **Tech Stack:** *HTML • CSS • JavaScript • Email-JS • Vercel*

Spotify Analysis Dashboard *GitHub*

- **Problem Statement:** Raw Spotify streaming data is difficult to interpret without visualization, limiting quick insight into listening habits and artist performance.
- **About the Project:** Built an interactive Power BI dashboard with custom DAX measures and dynamic filters to explore artist, album, and listening trends.
- **Outcome:** Developed hands-on expertise in data cleaning, KPI creation, interactive dashboard development, and converting complex datasets into meaningful visual insights.
- **Tech Stack:** *Power BI • DAX • Power Query*

TECHNICAL SKILLS

- **Languages:** Python, C/C++, JavaScript, SQL
- **Frontend:** HTML5, CSS3, React.js
- **Backend:** Node.js, Express.js
- **Data Analytics:** Power BI, DAX, Power Query

- **CS Fundamentals:** Data Structures and Algorithms, Operating Systems, Computer Networks, Computer Organisation
- **Tools:** Git/GitHub, Figma, VS Code, Jupyter Notebook

CERTIFICATIONS

- **Smart India Hackathon 2025 – Participant:**
  - **Problem Statement:** Students often lack an engaging, centralized platform that combines learning resources, interactive activities, and progress tracking.
  - S**olution:** Developed **EduGame**, a gamified learning platform featuring AI-powered assistance, interactive games, e-book library, live classes, and rewards to make learning more engaging and personalized
- **Data Analysis & Visualization with Power BI:** Microsoft (Coursera)
- **Version Control:** Meta (Coursera)
